

## TOOLS

## Study effectively

- **Study in groups**, share ideas with my colleagues about a topic and try to analyze what we have learned.
- **Use different colored highlighters** to underline what is most important. That stimulate my brain and make it easier to study.
- **Practice makes the master**, never try to learn something by heart, just put it into practice and you will see that it works for you.
- In your free moments, **help your classmates** and so you practice what you already know.
- **A place to study**, the main tool that helped me during my junior and senior year was purchasing a desk to do my homework.
- **Ask for help** when You don't understand something, it will make everything easier for you.
- **Make** colorful and illustrative **summaries** (mental maps) to understand better the topic.
